

ABSTRACT

05/18/154

A ABSTRACT OF THE DISCLOSURE

A For a possibly flexible use of an arrangement (1) for mixing and/or
A processing one or more video signals, the arrangement (1) ^{includes} ~~comprises~~ video hardware
A components (2) which are implemented for a dedicated purpose and, within the arrangement
(1), are exclusively usable for said dedicated purpose, in that the arrangement (1) ^{also includes} ~~comprises~~
5 video computers (3, 4) which can alternatively perform a plurality of functions and are thus
usable within the arrangement (1) for different purposes, dependent on their need, the video
hardware components (2) being implemented for uses which are computer-intensive and/or
require a large bandwidth, the video computers (3, 4) being provided for uses which can be
processed in real time by the video computers (3, 4), the arrangement (1) accommodating a
10 control circuit (6) which assigns tasks to the video computers (3, 4), dependent on their
need.
